## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 - 2, 4, 7 - 9, 13 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Greenstein.

Greenstein, U.S. Patent No. 538138, discloses an electrical interconnect for multilayer transducer elements. As shown in Figure 1, the device includes electrodes 18 and 20 connected to ground and alternate signal electrodes 22 and 24 which are electrically interconnected by via segments 26 and 28. Ground electrodes 18 and 20 are also connected by a via along the side of the element 10. Backing material 38 is made of a material such as polymer, as described in column 4, line 9.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Greenstein.

Greenstein does not disclose that the backing material 38 is attached by an adhesive however the use of adhesive to attach components is well known in the art and would have been obvious to one of ordinary skill in the art at the time the invention was made.

***Allowable Subject Matter***

Claims 5, 6 11 and 12 14, 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
